

Biprint®

Technical data

- **Material** *Polypropylene copolymer*
- **Colours** *Standard : Black, white, natural
Optional : grey, yellow, red, blue, orange, green
We can match your specific colour requirements (subject to a minimum order quantity)*
- **Thickness** *2 – 10 mm*
- **Weight** *250 – 2000 g/m²*
- **Widths** *300 – 2600 mm*
- **Length** *< 300 g/m² : 400 – 8000 mm
< 650 g/m² : 300 – 8000 mm
> 650 g/m² : 200 – 8000 mm*
- **Tolerances** *Length: -0/+0,5 %
Width: ± 3 mm
Squareness: ± 0,5%*
- **Corona treatment** *38 dyne lasting, double-sided*
- **Recyclability** *100% recyclable , class 5*
- **Behaviour** *Resistant to water, greases and oils
Good resistance to mineral and organic acids and solvents*
- **Optional features on request** *UV treated
Anti-static
Flame retardant
Micro-perforated*

- Biprint® is kept in stock in a few standard formats for rapid shipment (white only) :

	3,0mm-450g/m ²	3,5mm-650g/m ²	8,0mm-1800g/m ²
1200 x 800 mm	yes	yes	no
800 x 1200 mm	yes	yes	no
1600 x 1200 mm	yes	yes	no
1200 x 1600 mm	yes	yes	no
3000 x 2000 mm	no	no	yes

Other thickness/weight combinations or dimensions on request

Biprint®

Biprint®

Biprint® is the ideal printing medium. Its double-sided corona treatment allows easy printing, even for digital printing. Biprint® is resistant to moisture, it is strong and still very light. This makes Biprint® the perfect substrate for outside and inside applications. The corona treatment also provides a better adhesion when gluing the sheets to other materials, or when using adhesives.

Biprint® can be easily cut or die-cut and can thus be converted into virtually any shape.

Biprint® is available in different colours.

Biprint® is extruded from polypropylene copolymer, it is much more durable than cardboard and is completely recyclable.

Biprint® can be used for :

- estate boards
- publicity panels
- site-boards
- temporary signs
- displays
- POS displays
- promotional & merchandising boxes

...
